About

I am recent Electrical and Computer Engineering graduate from Arba Minch University, specializing in Computer Engineering. Passionate about integrating hardware and software to solve real-world problems, with strong interests in networking, embedded systems, and automation. Skilled in programming, software development, and hands-on projects. Reliable, adaptable, and a strong team player committed to continuous learning and innovation.

Education

From Arbaminch University, *Bachelor Science in Electrical and Computer engineering*

2021 – 2025 | Arbaminch, Ethiopia

Graduation Year: 19 June, 2025 G.C
GPA: 3.42
Exit result: 78 out of 100.
Award: Dean's of List Academic Excellence

Certificates

- Computer HW and SW Maintainance at Arbaminch University
- Programming Fundamnetal Data analysis from Udacity
- Dereja Academy Accelerator Program- Employability and Job readiness
- AMU Student Academic Mission Upgrade(SAM_UP) Club-lecture and support in engineering course from Arba minch university
- Entrepreneurial Attitude & Competency Program, Arbaminch university

Additional Skill

- Fast and accurate typist
- Computer skill
- Strong problem-solving skills and a willingness to learn
- Excellent collaboration with teamwork and fast learner

Skills

Front-end Developer:React.js,Next.js,HTML5,CSS,Javascript(ES6+)

- Tools: MATLAB, Arduino, Multisim and VS Code
- Web: HTML, CSS, JavaScript
- Computer and IT literacy
- System configuration and troubleshooting

Professional Experience

July 2024 – October 2024 | Addis Ababa, Ethiopia

- **At Everlink Digital Technologies PLC, Addis Ababa, Ethiopia**
- Developed a full-featured e-learning platform with role-based access for Students, Instructors, Admins, and Parents

Projects

Enllite for all platform project,
Role: front end developer
07/2024 – 10/2024

- Designed and implemented responsive front-end components using React.js, HTML, and CSS, ensuring seamless user experience across devices.
- Developed a full-featured e-learning platform with role-based access for Students, Instructors, Admins, and Parents

Fingerprint-Based Voting System project,
Final Year Project at Arbaminch University
05/2025

- Designed and developed a biometric voting system using React (frontend) and Laravel (backend) integrated with Arduino for fingerprint authentication
- Enabled secure and tamper-proof voting through real-time fingerprint verification and role-based access
